

DISCLAIMER

The present version of the national guideline has been accepted by the President of the CPVO for its use in technical examinations carried out on behalf of the CPVO or for the take-over of reports serving as a basis for a CPVO decision.

Aloysia
Simplified standard protocol: SSP/ALO/1

Examination office:	Naktuinbouw	
Reference of the protocol:	SSP/ALO/1	
Date of preparation of the protocol:	29/12/2022	
Date of entry into force of the protocol:	31/03/2022	
Botanical taxon:	Aloysia citrodora Paláu	
Common Name (when known):	Lemon-verbena	
Way of propagation of the plants to be examined:	Self or cross pollinated seed propagated <input type="checkbox"/> Vegetatively propagated <input checked="" type="checkbox"/>	
Number of growing cycles:	1 <input checked="" type="checkbox"/> 2 <input type="checkbox"/> Other <input type="checkbox"/> specify	
List of grouping characteristics:	Yes <input type="checkbox"/> if yes put as annex No <input checked="" type="checkbox"/>	
Minimum number of plants in trial:	Vegetative:20	Seed: -
Minimum number of plants observed by measuring or counting:	Vegetative:1	Seed: -
Give description of when observations should take place:	Observation should take place: after 6 months of growing in the test facility	
<p>Uniformity:</p> <ul style="list-style-type: none"> - For the assessment of uniformity of vegetatively propagated, self-pollinated seed propagated varieties or F1-hybrids, a population standard of 1% and an acceptance probability of at least 95% should be applied. In the case of a sample size of 20 plants, 1 off-type is allowed. - For the assessment of uniformity for cross-pollinated varieties, the recommendations for cross-pollinated varieties in the General introduction of UPOV should be applied. The variability within the variety should not exceed the variability of comparable varieties already known. 		
Table of characteristics:	Present <input checked="" type="checkbox"/>	

	Not available <input type="checkbox"/>
Literature: (when present, please annex to this document)	Present <input checked="" type="checkbox"/> Absent <input type="checkbox"/>

Table of characteristics: Aloysia

1. Plant: growth habit
2. Plant: height
3. Plant: attitude of lateral branches in relation to main branch
4. Leaf blade: length
5. Leaf blade: width
6. Leaf blade: shape
7. Leaf blade: shape of base
8. Leaf blade: shape of apex
9. Leaf blade: colour of upper side RHS Colour Chart (indicate reference number)
10. Leaf blade: anthocyanin colouration of upper side
11. Leaf blade: density of serration
12. Leaf blade: undulation of margin
13. Leaf blade: shape in cross section
14. Leaf blade: curvature of longitudinal axis
15. Petiole: length
16. Petiole: colour
