

DISCLAIMER

The present version of the national guideline has been accepted by the President of the CPVO for its use in technical examinations carried out on behalf of the CPVO or for the take-over of reports serving as a basis for a CPVO decision.

Aruncus
Simplified standard protocol: SSP/ANC/1

Examination office:	Naktuinbouw	
Reference of the protocol:	SSP/ANC/1	
Date of preparation of the protocol:	04/01/2022	
Date of entry into force of the protocol:	01/04/2022	
Botanical taxon:	Aruncus L.	
Common Name (when known):	Aruncus	
Way of propagation of the plants to be examined:	Self or cross pollinated seed propagated <input type="checkbox"/> Vegetatively propagated <input checked="" type="checkbox"/>	
Number of growing cycles:	1 <input checked="" type="checkbox"/> 2 <input type="checkbox"/> Other <input type="checkbox"/> specify -	
List of grouping characteristics:	Yes <input type="checkbox"/> if yes put as annex No <input checked="" type="checkbox"/>	
Minimum number of plants in trial:	Vegetative:20	Seed: -
Minimum number of plants observed by measuring or counting:	Vegetative:1	Seed: -
Give description of when observations should take place:	Observation on the flower should take place: at full flowering Observation on the leaf should take place: on fully-grown leaves Other observations should take place: at full flowering	

<p>Uniformity:</p> <ul style="list-style-type: none"> - For the assessment of uniformity of vegetatively propagated, self-pollinated seed propagated varieties or F1-hybrids, a population standard of 1% and an acceptance probability of at least 95% should be applied. In the case of a sample size of 20 plants, 1 off-type is allowed - For the assessment of uniformity for cross-pollinated varieties, the recommendations for cross-pollinated varieties in the General introduction of UPOV should be applied. The variability within the variety should not exceed the variability of comparable varieties already known. 	
Table of characteristics:	<p>Present <input checked="" type="checkbox"/></p> <p>Not available <input type="checkbox"/></p>
Literature: (when present, please annex to this document)	<p>Present <input checked="" type="checkbox"/></p> <p>Absent <input type="checkbox"/></p>

Table of characteristics: Aruncus

1. Plant: growth habit
2. Plant: height
3. Stem: thickness
4. Stem: color
5. Stem: intensity of anthocyanin coloration
6. Stem: pubescence
7. Leaf: type of blade
8. Leaf blade: length
9. Leaf blade: width
10. Leaf blade: shape in cross-section
11. Leaf blade: color
12. Leaf blade: intensity of anthocyanin coloration
13. Leaf blade: glossiness
14. Leaf blade: pubescence of upper side
15. Leaf blade: color of lower side
16. Leaf blade: pubescence of lower side
17. Terminal leaflet: length
18. Terminal leaflet: width
19. Terminal leaflet: shape
20. Terminal leaflet: shape of base
21. Terminal leaflet: shape of apex
22. Terminal leaflet: margin
23. Petiole: length
24. Petiole: color
25. Petiole: intensity of anthocyanin coloration
26. Inflorescence: length
27. Inflorescence: width
28. Inflorescence: position of laterals
29. Pedicel: color
30. Pedicel: pubescence
31. Flower bud: color
32. Flower: diameter
33. Calyx: color
34. Petal: shape
35. Petal: shape of apex
36. Petal: color
37. Filament: color
38. Anther: color
39. Style: color
40. Stigma: color
